

# Remote Simultaneous Interpretation

powered by Interpretfy

Remote Simultaneous Interpretation (RSI) is an effortless, convenient, real-time language interpretation solution tailored to your specific needs.

No matter when, where, or what kind of event, RSI connects qualified remote interpreters from around the world, ensuring that you get the highest quality interpreters at the best global rate.

## RSI for Conferences

Get traditional conference interpretation with a tech boost at your next event. With RSI, you can provide dozens of languages at once to hundreds of attendees across multiple parallel breakout sessions, all in real time.

## RSI for Web Meetings

Is your business looking to tap into a global market? RSI works great with any virtual meeting platform and allows an unseen translator to interpret your multilingual conversation simultaneously without missing a beat. Hold webinars with global clients and international business partners as if they were fluent in your own language.

## How RSI works

A presenter or participant at a live event speaks in one language. His audio and video are streamed to the remote interpreter.

A remote interpreter sees and hears the participants at a conference or web meeting on his computer. He then interprets what is said as it is being said, into a different language.

A participant does not understand a speaker's language. Instead, she uses her RSI smartphone or computer application to listen to everything in her own native language. The simultaneous interpretation is streamed live with no delay or drop in quality. She can hear everything as if the interpreter was in the same room next to her.

## The RSI Benefit

**It's effortless.** Because participants use their smart phone or other electronic devices, there is no need for cumbersome traditional headsets, receivers, or sound proof booths. The setup is hassle-free, and the user experience is easy and intuitive.

**It's sustainable.** Because interpreters don't need to travel and there is no dedicated equipment, the carbon footprint of an event is reduced significantly.

**It's cost-effective.** With remote interpretation, there are no travel costs for interpreters or expensive equipment rentals and its related labor. With RSI, users save an average of more than 50% over traditional simultaneous interpretation.

**It's reliable.** Remote Simultaneous Interpreters are experienced linguists accredited and trained to provide simultaneous interpreter services in the most demanding technical settings.

Simplicity, affordable rates, and expert simultaneous interpretation make RSI the preferred solution for conferences and virtual meetings in any language, at any time. Tap into a global audience and gain access to international markets by integrating remote simultaneous interpretation into your next event.
